FAEES MOHAMMED

Certified Management Accountant (CMA-USA) | Finance, Audit & Procurement
+91-8891341417 | faeekhaleel@gmail.com | Kerala, India | linkedin.com/in/faeesmohammedcma

PROFILE

Certified Management Accountant (CMA-USA) with over a year and a half across finance, audit and procurement. The work so far has covered statutory audit support, financial reporting, bank and GST reconciliations, and the full procurement cycle — raising purchase orders, managing suppliers, reconciling invoices and keeping track of payables. Comfortable in Tally ERP, Xero and advanced Excel, and has built internal reporting tools that replaced manual tracking for the team. Careful with figures, quick to trace a discrepancy back to its source, and always looking for ways to make routine work lighter without losing accuracy.

CORE COMPETENCIES

- Financial Reporting
- Statutory & Internal Audit
- Financial Statement Preparation
- Accounts Payable & Receivable
- Documentation & Compliance
- Financial Analysis
- Vendor & Supplier Management
- Purchase Order Management
- Invoice Reconciliation
- Risk Assessment & Internal Controls
- Data Validation & Reconciliation Controls
- Process Automation & Reporting Tools

EXPERIENCE

Analyst – GDS | M A Moideen & Associates, Ernakulam *Jan 2026 – Present*

- Run procurement end to end — RFQs and RFPs, purchase order issuance and BOQ verification.
- Work with the finance team to see that supplier payments are released on time.
- Close out projects through DN–PO matching and BOQ validation.
- Reconcile supplier invoices, follow up on discrepancies and keep outstanding payables under watch.
- Keep procurement records, trackers and vendor documentation accurate and current.
- Built three tools now used by the client's procurement team — a procurement dashboard, a quotation analysis tool and a fleet rate card — taking over work the team had been doing by hand (described below).

Audit Assistant | M A Moideen & Associates, Ernakulam *Jul 2025 – Dec 2025*

- Helped plan and carry out statutory audit assignments across a range of industries.
- Handled GST reconciliations, opening balance verification and the preparation of financial statements.
- Prepared working papers and supporting documentation in line with applicable standards.
- Carried out bank reconciliations, ledger scrutiny, vouching and verification of accounting records.
- Supported senior auditors in identifying control weaknesses and suggesting improvements.

Audit & Accounts Associate | Taxpert Pro Acc, Ernakulam *Dec 2024 – Mar 2025*

- Supported internal and external audit assignments in line with accounting standards.
- Reconciled accounts and helped prepare financial reports.
- Tightened documentation and reconciliation processes using Tally ERP and Zoho.
- Took part in risk assessment procedures and the review of internal controls.
- Prepared audit schedules and reports for senior review.

PROJECTS

Procurement Dashboard | Client account

Gives the procurement team and management a single live view of purchase orders, debit notes, payments and payables across two group entities, in place of a tracker that had to be read line by line.

- Outstanding payables and PO status are visible at a glance, so month-end reporting and payment planning no longer wait on manual compilation.
- Discrepancies between POs and debit notes, and missing delivery notes, are surfaced automatically — issues the team previously found only by chance.

- Cancelled POs, free-of-charge items and overpayments are treated the same way every time, so the figures reported to management agree whoever prepares them.
- Local and AED reporting across monthly, quarterly, half-yearly and annual views gives management comparable numbers for both entities.

Quote Desk | Client account

Turns supplier quotations arriving in any format into one comparable sheet, so the team can compare offers in minutes rather than retyping each quotation by hand.

- Removes the retyping step entirely, shortening the gap between receiving quotations and making a recommendation.
- Every line is checked against the supplier's own total and mismatches are flagged, so pricing errors are caught before a supplier is selected.
- Warns when quotations cover different scopes, preventing recommendations built on prices that were never comparable.
- Runs offline from a single file, so the team can use it without IT support and quotation data never leaves their own machine.

Fleet Rate Card | Client account

Gives the procurement team and management a view of the rates actually paid over the past year, so negotiations open from evidence rather than memory.

- Shows the lowest, median and highest rate paid for an item in a location, so the team knows the market before approaching a supplier.
- Draws on over 2,000 confirmed rates taken from purchase orders across Gulf and international locations, each shown in its own local currency.
- Anyone on the team can submit a new rate, and entries stay pending until approved, so the benchmark keeps current without losing control of what goes into it.
- Supplier names are not shown — the tool reports the market, not individual suppliers.

EDUCATION

Certified Management Accountant (CMA – USA) *2023 – 25*
Logic School of Management, Ernakulam, Kerala

Bachelor of Business Administration (BBA) *2020 – 23*
University Institute of Technology (UIT), Alappuzha, Kerala
